Norman Hussey

FRONT END DEVELOPER

ABOUT ME

I am a Front End Developer based in Toronto. I taught myself BASIC when I was a kid by making my own text adventures and I've been in love ever since. Coding speaks to me because it is the perfect harmony between logic and creativity. It hinges on communication and collaboration which are two of my biggest strengths. It is a tool of limitless creation and I live to create. I was built to code.

FEATURED PROJECTS

Merchant's Road

JavaScript, React, Firebase

An economic trading game set in Medieval Europe where you travel from town to town buying and selling goods. Includes a detailed banking system with loans, debt collectors, and interest rates, as well as purchasable properties that produce sellable goods.

Divender of the Galaxy

JavaScript, jQuery, Firebase

An endless, rogue-like arcade space shooter made entirely in the DOM. Each enemy wave produces faster, more aggressive, and more intelligent opponents who will not only attack but also try to avoid collisions. Includes a world leaderboard of the top ten high scores.

HaikYou

JavaScript, React, Firebase, Axios, RESTful API

A haiku generator app created as a group programming project. Enter the first word of your haiku and choose the rest from a collection of randomly chosen related words gathered from the Datamuse API. When finished, your poem can be titled and saved to a public database for all to read.
